Fellow Impact Technologies d.o.o. - App Developer

What if you had the chance to **develop your ideas** and make the world a better place at the same time?
At Felloz, you will have the opportunity to **revolutionize** the way people donate by building groundbreaking digital products.

What to expect:
You will be working together with a product designer, a product owner and a full-stack web developer on our flagship product: Felloz customizable donation app.
In The First Week, Expect To
- Onboard into the Felloz-Crew with the help of the product team
- Become acquainted with our mission, vision and, the product goals, and those you will work closely with
- Get familiar with the current software architecture under the guidance of our development team
In The First Month, Expect To
- Start to set up the basic architecture for our Version 2.0 of our application
- Start its development from scratch using frameworks like React Native
- Using agile development methodologies (SCRUM)
In The First Three Months, Expect To
- Get full responsibility for the App development process
In The First Year, Expect To
- Build products from the ground up
- Lead your engineering team

Requirements:
- Previous work and projects that you want to show us

Perks
- Employee Stock Option Plan
- Gym Membership
- Apple Macbook
- Testing Device
- Remote days possible
- Milestone based bonus
- Commuter benefits
- Maternity/Paternity leave
- Optional volunteering opportunities at our clients

Salary
We are transparent about the salary.
Here is the net minimum you may expect based on your previous experience:
- 16.500+kn / 2200€ (depending on previous experiences)
- Substantial part of the shares as part of the compensation package
